

Sodermol®

Cosmética Mediterránea

TECHNICAL SHEETS

MOISTURIZING EMULSION SPF 15

COMPOSITION: Formulated with Argan Oil, which is exceptionally rich in natural tocopherols (vitamin E), carotenes, squalenes, and fatty acids. The antioxidant property of tocopherols, which act on the essential fatty acids of the membranes and provide stability. It also acts on the inhibition of free radicals, preventing them from becoming active and oxidizing the membranes. It also contains Betaine, which is a powerful moisturizing agent, making that hydration deeper and longer lasting. It acts as an organic osmolyte, attracting cellular water, but without immobilizing it. Contains sun protection factor 15.

PRESENTATION: Airless 50ml.

PAO: 12M

INCI: Aqua; Caprylic/capric Triglyceride; Triethylhexanoin; Butyl Methoxydibenzoylmethane; Glycerin; Betaine; Ethylhexyl Triazone; Octocrylene; Ethylhexyl Methoxycinnamate; Benzyl Alcohol; Sodium Polyacrylate; Argania Spinosa Kernel Oil; Potassium Cetyl Phosphate; Ethylhexyl Stearate; Parfum; Acrylates/C10-C30 Alkyl Acrylate Crosspolymer; Disodium EDTA; Salicylic Acid; Trideceth-6; Sorbic Acid; Linalool; Citronellol; B HT; Limonene.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

NUTRI-RESTORE EMULSION

COMPOSITION: Emulsion formulated with a new generation synthetic Tripeptide, which acts very effectively against wrinkles. To avoid the creation of wrinkles or reduce them, some of the stages that lead to muscle contraction must be interrupted. One stage would be neuronal exocytosis and the other, the contraction/relaxation of fibroblasts, which are anchored to the connective tissue, therefore, their contraction or decontraction is transferred to this tissue, causing tension or relaxation in the skin. This is where the tripeptide acts, which is capable of relaxing fibroblasts by binding to the nicotinic acetylcholine receptor in the cell membrane, closing the passage of sodium ions to the postsynaptic membrane and causing muscle relaxation. An in vivo study resulted in a 52% reduction in the depth of wrinkles, in addition to obtaining finer and more luminous skin, by applying an emulsion with this 4% tripeptide applied twice a day for 28 days.

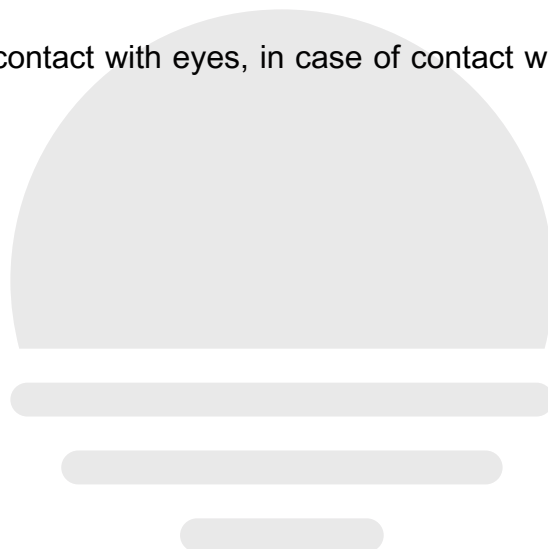

PRESENTATION: Airless 50ml.

PAO: 12M

INCI: Aqua; Hydrogenated Polydecene; Glycerin; Methylpropanediol; Sesamum Indicum Seed Oil; Sodium Polyacrylate; Argania Spinosa Kernel Oil; Ethylhexyl Stearate; Caprylyl Glycol; Parfum; Trideceth-6; Disodium EDTA; Phenylpropanol; Hippophae Rhamnoides Fruit Extract; Sodium Hyaluronate; Dipeptide Diaminobutyroyl Benzylamide Diacetate; Tocopherol; Linalool; Citronellol; Limonene.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

NUTRI-RESTORE EMULSION

ADDITIONAL CHARACTERISTICS: HYALURONIC ACID contributes strongly to the water maintenance and structure of the skin, acting as a link between water molecules and tissues. It constitutes a powerful moisturizing agent. It also has, according to various studies, anti-inflammatory capacity, acting firstly with a “barrier” effect for germs and secondly by binding to the germs through a surface protein. Its moisturizing capacity has been proven because it acts on the dermis, contributing to tissue regeneration and maintaining water balance. The disaccharide molecules are easily hydrated, creating an ionic barrier, as well as a water reservoir by bonding with it. The topical use of Hyaluronic Acid helps to rehydrate the skin thanks to the cross-linking of the chain of this acid in the fundamental substance of the dermis, which fills the interfiber spaces of collagen, causing water retention as if it were a “molecular sponge.”. Regenerative and healing properties are also attributed to it. It causes stimulation, neoformation of collagen and stimulates the growth of connective tissue cells. It therefore contributes to accelerating healing and a higher quality of tissue repair.

Sea Buckthorn Oil is rich in group B vitamins, provitamin A, C, and E. It also contains mono- and polyunsaturated fatty acids: Omega 3 (Linolenic Acid), Omega 6 (Linoleic Acid), Omega 7 (Palmitoleic Acid) and Omega 9 (Oleic Acid). Protects the epidermis from unfavorable conditions, helping to recover its elasticity and softness. Due to its high Omega 7 content, which provides regeneration and nutrition to the skin, it would be highly indicated in cases of eczema, atopic dermatitis and psoriasis.

Argan Oil stands out for its high doses of vitamin E and omega 3 fatty acids, making it an excellent antioxidant. It also contains vitamin A. It moisturizes and nourishes deeply, and has bactericidal and fungicidal properties. It is an ideal oil to hydrate the skin and fight against aging. Like all oils, Argan oil deeply hydrates and nourishes, so it is ideal for dehydrated and dry skin. It is not sticky and absorbs quickly. It works for the face and also for the body. It is usually part of anti-aging treatments, due to its antioxidant power, it helps prevent the formation of wrinkles, softens the skin and gives it luminosity. It gives the skin great elasticity and, more importantly, restores the hydrolipid mantle. It is suitable for all skin types. Acne skin can use it because it is a non-comedogenic product. And skin prone to dermatitis improves because it has great regenerating power and a calming effect.

Sodermol®

ANTI-AGE EMULSION

COMPOSITION: Emulsion formulated with a combination of the latest anti-aging active ingredients. It contains ORGANIC SILICON, which stimulates skin regeneration due to its great antioxidant and anti-free radical power. It acts on skin hydration, normalizing the water content in the skin and preventing desiccation.

PRESENTATION: Airless 50ml.

PAO: 12M

INCI: Aqua; Hydrogenated Polydecene; Methylsilanol Mannuronate; Methylpropanediol; Propanediol; Sodium Polyacrylate; Ethylhexyl Stearate; Glycerin; Caprylyl Glycol; Fagus Sylvatica Bud Extract; Parfum; Trideceth-6; Acmeella Oleracea Extract; Disodium EDTA; Phenylpropanol; Phenoxyethanol; Sodium Hyaluronate; Linalool; Sorbic Acid; Citronellol; Limonene.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

ANTI-AGE EMULSION

ADDITIONAL CHARACTERISTICS: HYALURONIC ACID contributes strongly to the water maintenance and structure of the skin, acting as a link between water molecules and tissues. It constitutes a powerful moisturizing agent. It also has, according to various studies, anti-inflammatory capacity, acting firstly with a “barrier” effect for germs and secondly by binding to the germs through a surface protein. Its moisturizing capacity has been proven because it acts on the dermis, contributing to tissue regeneration and maintaining water balance. The disaccharide molecules are easily hydrated, creating an ionic barrier, as well as a water reservoir by bonding with it. The topical use of Hyaluronic Acid helps to rehydrate the skin thanks to the cross-linking of the chain of this acid in the fundamental substance of the dermis, which fills the interfiber spaces of collagen, causing water retention as if it were a “molecular sponge.”. Regenerative and healing properties are also attributed to it. It causes stimulation, neoformation of collagen and stimulates the growth of connective tissue cells. It therefore contributes to accelerating healing and a higher quality of tissue repair.

BEECH Extract (*Fagus sylvatica* sp) is also a powerful anti-aging active ingredient, which acts by reducing the microrelief of the skin and improving skin hydration, since it increases oxygen consumption and protein synthesis in keratinocytes.

Finally, the Botox-like active ingredient par excellence has been added, obtained from *Acemella Oleracea*, a plant of tropical origin. The studies carried out demonstrate a rapid effect on the reduction of wrinkles, by immediately limiting facial micro-contractions, due to its muscle-relaxing action.

Sodermol®

WRINKLE REPAIR EMULSION

COMPOSITION: Contains Leucojum aestivum bulb extract, a powerful Botox-like active ingredient, which effectively inhibits the contraction of muscle cells, reducing and preventing the appearance of wrinkles and expression lines with a powerful antioxidant effect. Betaine increases the growth of fibroblasts and collagen production, protecting the cell against oxidative stress and providing deeper and longer-lasting hydration.

PRESENTATION: Airless 30ml.

PAO: 12M

INCI: Aqua; Caprylic/capric Triglyceride; Triethylhexanoin; Glycerin; Betaine; Sodium Polyacrylate; Benzyl Alcohol; Polyperfluoroethoxymethoxy Difluoroethyl PEG Phosphate; Ethylhexyl Stearate; Parfum; Acrylates/C10-C30 Alkyl Acrylate Crosspolymer; Disodium EDTA; Salicylic Acid; Trideceth-6; Sorbic Acid; Leucojum Aestivum Bulb Extract; Linalool; Citronellol; Limonene.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

EYE CONTOUR EMULSION

COMPOSITION: Non-photosensitizing emulsion, obtained from several components, including active ingredients derived from 3 plants:

ACMELLA OLERACEA from which Espilanthol is obtained.
FRAXINUS EXCELSIOR, ORGANIC SILICON AND VITAMIN B3.
ARGANIA SPINOSA

PRESENTATION: Airless 30ml.

PAO: 12M

INCI: Aqua; Caprylic/capric Triglyceride; Triethylhexanoin; Glycerin; Methylpropanediol; Butylene Glycol; Niacinamide; Sodium Polyacrylate; Fraxinus Excelsior Bark Extract; Silanetriol; Potassium Citrate; Spilanthus Acmella Flower Extract; Argania Spinosa Kernel Oil; Polyperfluoroethoxymethoxy Difluoroethyl PEG Phosphate; Caprylyl Glycol; Phenylpropanol; Benzyl Alcohol; Glycolic Acid; Salicylic Acid; Sorbic Acid; Acrylates/C10-C30 Alkyl Acrylate Crosspolymer; Ethylhexyl Stearate; Trideceth-6; Disodium EDTA.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

EYE CONTOUR EMULSION

ADDITIONAL CHARACTERISTICS: ACMELLA OLERACEA from which Espilanthol is obtained, considered natural Botox for its muscle-relaxing effects on the muscles responsible for the formation of wrinkles.

Stimulates the biomechanical functions of fibroblasts, reorganizing the collagen network of the dermal structure.

FRAXINUS EXCELSIOR, ORGANIC SILICON AND VITAMIN B3. Ash Bark Extract, titled Esculin and Fraxine, has anti-inflammatory, venotonic, and vasoprotective properties by stabilizing capillary membranes. It provides an improvement in circulation, reducing bags and dark circles, avoiding the appearance of a tired look and the dark color of dark circles. Organic Silico helps reinforce the structure and elasticity of the vessels, giving them more strength and flexibility and improving the resistance of the connective tissue. Vitamin B3 helps strengthen the structure of the basal wall of blood vessels through its action on collagen synthesis. This vascular-protective effect allows maintaining or restoring normal blood flow at the level of the blood capillaries.

ARGANIA SPINOSA is very rich in rapidly absorbed unsaturated oils, oleic, linoleic and ferulic acids that create a photolipid barrier that protects from ultraviolet A and B radiation. It also provides a high content of vitamin E.

m e t h o d

Sodermol®

GLOBAL ANTI-AGING DAY CREAM

COMPOSITION: This cream is specially formulated for mature skin. Its application in the morning is recommended since it contains sun protection factor of 15. Composed of:

Hyaluronic acid
Organic silicon
Argan oil
Betaine
Niacinamide or vitamin B3

PRESENTATION: 50ml jar.

PAO: 12M

INCI: Aqua; Caprylic/Capric Triglyceride; Triethylhexanoin; Glycerin; Butyl Methoxydibenzoylmethane; Niacinamide; Betaine; Ethylhexyl Methoxycinnamate; Ethylhexyl Triazone; Octocrylene; Lecithin; Benzyl Alcohol; Sodium Polyacrylate; Glycosaminoglycans; Dimethylaminoethanol Tartrate; Argania Spinosa Kernel Oil; Polyperfluoroethoxymethoxy Difluoroethyl PEG Phosphate; Ethylhexyl Stearate; Parfum; Acrylates/C10-C30 Alkyl Acrylate Crosspolymer; Glycogen; Butylene Glycol; Disodium EDTA; Salicylic Acid; Trideceth-6; Sorbic Acid; Phenoxyethanol; Sodium Benzoate; Potassium Sorbate; Hyaluronic Acid; Silanetriol; Citric Acid; Linalool; B HT; Citronellol; Limonene.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

GLOBAL ANTI-AGING DAY CREAM

ADDITIONAL CHARACTERISTICS: Hyaluronic Acid contributes strongly to the water maintenance and structure of the skin, acting as a link between water molecules and tissues. It constitutes a powerful moisturizing agent. It also has, according to various studies, anti-inflammatory capacity, acting firstly with a "barrier" effect for germs and secondly by binding to the germs through a surface protein. Its moisturizing capacity has been proven because it acts on the dermis, contributing to tissue regeneration and maintaining water balance. The disaccharide molecules are easily hydrated, creating an ionic barrier, as well as a water reservoir by bonding with it. The topical use of Hyaluronic Acid helps to rehydrate the skin thanks to the cross-linking of this acid in the fundamental substance of the dermis, which fills the interfiber spaces of collagen, causing water retention as if it were a "molecular sponge." Regenerative and healing properties are also attributed to it. It causes stimulation, neoformation of collagen and stimulates the growth of connective tissue cells. It therefore contributes to accelerating healing and a higher quality of tissue repair. Organic Silicon acts on the renewal of the epidermis, stimulating the synthesis of collagen and hyaluronic acid to fill and smooth wrinkles. Argan Oil is very rich in rapidly absorbed unsaturated oils, oleic, linoleic and ferulic acids that create a photolipid barrier that protects against ultraviolet A and B radiation. It also provides a high content of vitamin E. The phytosterols it contains give it a anti-inflammatory, calming and anti-allergic activity. It also contains Betaine, a highly moisturizing, soothing and anti-irritant active ingredient. It is a highly purified, anhydrous betaine extracted from beets. Osmolytes control the water balance of living cells by attracting and retaining moisture. Niacinamide or vitamin B3 is an essential nutrient in many body functions. It has anti-aging effectiveness because it stimulates collagen synthesis and reduces the appearance of wrinkles. In the case of sensitive skin or skin with alterations in the barrier function, it improves the skin's barrier function by stimulating the synthesis of filaggrin, ceramides and involucrin (reduces sensitivity and improves skin hydration). Its depigmenting action against spots and sebum-regulating action when there is excess sebum has also been observed. A powerful polysaccharide complex has been included that combines the action of marine glycogen and glycosaminoglycans (chondroitin sulfate and hyaluronic acid, also of marine origin). A glycosaminoglycan is a macromolecule found on the surface of eukaryotic cells and is thought to play a role in the recognition of other cells or a substrate. They are also called mucopolysaccharides. Glycogen is the source of energy for skin cells. Another active ingredient worth highlighting is DMAE (Dimethylaminoethanol), a powerful ingredient that is very effective against skin aging, with antioxidant activity and a firming and tightening action in the short and long term, as well as a cumulative effect.

Sodermol®

GLOBAL ANTI-AGING NIGHT CREAM

COMPOSITION: This cream is specially formulated for mature skin. Its application at night is recommended.

Hyaluronic acid
Argan oil
Rosehip oil
Resveratrol
Vitamin C
Organic silicon
beech extract
Niacinamide or vitamin B3

PRESENTATION: 50ml jar.

PAO: 12M

INCI: Aqua; Hydrogenated Polydecene; Niacinamide; Glycerin; Methylpropanediol; Sodium Polyacrylate; Argania Spinosa Kernel Oil; Ethylhexyl Stearate; Ethyl Ascorbic Acid; Rosa Canina Fruit Oil; Butylene Glycol; Caprylyl Glycol; Fagus Sylvatica Bud Extract; Caprylic/Capric Triglyceride; Parfum; Trideceth-6; Disodium EDTA; Phenylpropanol; Phenoxyethanol; Hyaluronic Acid; Dipeptide Diaminobutyroyl Benzylamide Diacetate; Citric Acid; Silanetriol; Sorbic Acid; Tocopherol; Resveratrol; Propyl Gallate; Linalool; Citronellol; Limonene.

DIRECTIONS: Apply at night to clean, dry skin with a gentle massage until completely absorbed. Avoid contact with the eyelid and lip area.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

GLOBAL ANTI-AGING NIGHT CREAM

ADDITIONAL CHARACTERISTICS: Argan Oil is very rich in rapidly absorbed unsaturated oils, oleic, linoleic and ferulic acids that create a photolipid barrier that protects against ultraviolet A and B radiation. It also provides a high content of vitamin E. The phytosterols it contains give it anti-inflammatory, soothing and anti-allergic activity.

Rosehip Oil is an oil rich in essential fatty acids with an important action in regulating skin elasticity and restoring hydration. In addition, it has regenerating, firming and photoaging corrective properties.

Resveratrol, obtained from the skin of red grapes, is a powerful antioxidant that stimulates the production of collagen fibers and increases the thickness of the epidermis. It inhibits carbonyl stress to prevent glycation, thus promoting the production of collagen and elastin. On the other hand, it provides the skin with omega 3, 6 and 9 fatty acids, which protect it from aggression, regenerate it and deeply nourish it.

Vitamin C acts on the one hand by repairing the collagen structure and on the other by increasing its synthesis, achieving a firming effect on the skin. Its anti-radical and anti-stain action is powerful.

Emulsion formulated with a new generation synthetic Tripeptide, which acts very effectively against wrinkles. To avoid the creation of wrinkles or reduce them, some of the stages that lead to muscle contraction must be interrupted.

Beech Extract (*Fagus sylvatica* sp) is also a powerful anti-aging active ingredient, which acts by reducing the microrelief of the skin and improving skin hydration, since it increases oxygen consumption and protein synthesis in keratinocytes.

Hyaluronic Acid contributes strongly to the water maintenance and structure of the skin, acting as a link between water molecules and tissues. It constitutes a powerful moisturizing agent. It also has, according to various studies, anti-inflammatory capacity, acting firstly with a "barrier" effect for germs and secondly by binding to the germs through a surface protein.

Niacinamide or vitamin B3 is an essential nutrient in many body functions. It has anti-aging effectiveness because it stimulates collagen synthesis and reduces the appearance of wrinkles. In the case of sensitive skin or skin with alterations in the barrier function, it improves the skin's barrier function by stimulating the synthesis of filaggrin, ceramides and involucrin (reduces sensitivity and improves skin hydration).

Its depigmenting action against spots and sebum-regulating action when there is excess sebum has also been observed.

Sodermol®

AGE FIGHTER SERUM

COMPOSITION: It is a revolutionary ultra-active facial treatment that helps reduce the signs of aging. Composed of cutting-edge active ingredients such as hyaluronic acid, vitamin C or resveratrol.

Hyaluronic acid

aloe vera

Fucogel

Resveratrol

G-cell

Vitamins A, E, F, H and B5

Vitamin C

pomegranate extract

PRESENTATION: Airless 30ml.

PAO: 12M

INCI: Aqua; Glycerin; PEG-20 Castor Oil; Aloe Barbadensis Leaf Juice; Butylene Glycol; Sclerotium Gum; Ethyl Ascorbic Acid; Alcohol Denat.; Phenoxyethanol; Xanthan Gum; Triethanolamine; Zea Mays Oil; PEG-60 Hydrogenated Castor Oil; Disodium EDTA; Benzoic Acid; Calcium Pantothenate; Inositol; Retinol; Parfum; Vitis Vinifera Fruit Meristem Cell Culture; Dehydroacetic Acid; Sodium Hyaluronate; Rosa Moschata Seed Oil; Biosaccharide Gum-1; Punica Granatum Fruit Extract; Sodium Benzoate; Potassium Sorbate; Citric Acid; Limonene; Resveratrol; Biotin; Tocopherol; Linalool; Citronellol.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

AGE FIGHTER SERUM

ADDITIONAL CHARACTERISTICS: Hyaluronic Acid contributes strongly to the water maintenance and structure of the skin, acting as a link between water molecules and tissues. It constitutes a powerful moisturizing agent. It also has, according to various studies, anti-inflammatory capacity, acting firstly with a “barrier” effect for germs and secondly by binding to the germs through a surface protein. Resveratrol, obtained from the skin of red grapes, is a powerful antioxidant that stimulates the production of collagen fibers and increases the thickness of the epidermis. It inhibits carbonyl stress to prevent glycation, thus promoting the production of collagen and elastin. On the other hand, it provides the skin with omega 3, 6 and 9 fatty acids, which protect it from aggression, regenerate it and deeply nourish it. Aloe Vera, which is an important cell regenerator, healing, toning and with great hydration power, when used regularly, helps prevent premature wrinkles and delays the appearance of age-related wrinkles. It also has anti-inflammatory activity: it inhibits the synthesis of prostaglandins and reduces the migration and infiltration of leukocytes, the release of histamine and the synthesis and secretion of leukotrienes. Regarding its regeneration and healing properties, Aloe stimulates the proliferation of keratinocytes, increases the correct intertwining of collagen fibers on the injured area due to cellular and tissue regeneration promoted by glycoproteins, re-epithelialization and angiogenesis favored by allantoin, and the anti-inflammatory and antimicrobial effect of polysaccharides and phenolic compounds. Fucogel is an anionic polysaccharide obtained through bacterial fermentation. It presents a double activity, on the one hand, physical, with moisturizing and film-forming properties, and on the other, biological with protein stimulation, regulation of inflammation markers and epidermal differentiation.

G-cell is obtained from the culture of meristematic cells or grape stem cells, which gives it a great capacity to neutralize free radicals produced by both external factors (pollution, UV radiation, etc.) and internal factors (stress, tobacco, poor nutrition, etc.). This neutralization occurs quickly thanks to the high bio-availability of the polyphenols synthesized by the meristematic cells, and this effect is also lasting over time.

Cocktail of vitamins A, E, F, H and B5 With moisturizing, antioxidant, energizing, revitalizing, nutrition and repair properties.

Vitamin C acts on the one hand by repairing the collagen structure and on the other by increasing its synthesis, achieving a firming effect on the skin. Its anti-radical and anti-stain action is powerful.

Pomegranate Extract contains a large amount of vitamins such as C and E, with anti-aging, antioxidant and anti-inflammatory properties.

Sodermol®

RETINOL SERUM

COMPOSITION: It is a revolutionary ultra-active facial treatment that helps reduce the signs of aging. Composed of cutting-edge active ingredients such as pure Retinol (0.3%), Niacinamide and grape stem cells.

PRESENTATION: 30ml dropper bottle.

PAO: 12M

INCI: Aqua; Niacinamide; Glycerin; Betaine; Octocrylene; Propanediol; Sclerotium Gum; Trideceth-9; PEG-40 Hydrogenated Castor Oil; Phenoxyethanol; Caprylic/Capric Triglyceride; Xanthan Gum; Retinol; Undecane; Acmella Oleracea Extract; Disodium EDTA; Benzoic Acid; Tridecane; Parfum; Propylene Glycol; Vitis Vinifera Fruit Meristem Cell Culture; Dehydroacetic Acid; Biosaccharide Gum-1; B HT; Citric Acid; Tocopherol; Propyl Gallate; Sodium Benzoate; Potassium Sorbate; Limonene; Linalool; Citronellol.

DIRECTIONS: Apply at night to clean, dry skin with a gentle massage until completely absorbed. Avoid contact with the eyelid and lip area.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

RETINOL SERUM

ADDITIONAL CHARACTERISTICS: Retinol is a cosmetic active ingredient for topical application that a large number of medical and scientific studies support for its effectiveness in reducing the most common signs of the skin that become accentuated over time, or what is known as skin aging.

Niacinamide or vitamin B3 is an essential nutrient in many body functions. It has anti-aging effectiveness because it stimulates collagen synthesis and reduces the appearance of wrinkles.

In the case of sensitive skin or skin with alterations in the barrier function, it improves the skin's barrier function by stimulating the synthesis of filaggrin, ceramides and involucrin (reduces sensitivity and improves skin hydration).

Its depigmenting action against spots and sebum-regulating action when there is excess sebum has also been observed.

Fucogel is an anionic polysaccharide obtained through bacterial fermentation. It presents a double activity, on the one hand, physical, with moisturizing and film-forming properties, and on the other, biological with protein stimulation, regulation of inflammation markers and epidermal differentiation.

G-cell is obtained from the culture of meristematic cells or grape stem cells, which gives it a great capacity to neutralize free radicals produced by both external factors (pollution, UV radiation, etc.) and internal factors (stress, tobacco, poor nutrition, etc.). This neutralization occurs quickly thanks to the high bio-availability of the polyphenols synthesized by the meristematic cells, and this effect is also lasting over time.

It also contains Betaine, a highly moisturizing, soothing and anti-irritant active ingredient. It is a highly purified, anhydrous betaine extracted from beets. Osmolytes control the water balance of living cells by attracting and retaining moisture. It is a natural osmoprotector, which protects cells from oxidative stress (UV radiation) and thermal stress (dehydration), controlling cellular water balance. On the other hand, it reinforces the epidermal barrier, providing hydration, protection and sensory benefits.

Finally, the Botox-like active ingredient par excellence has been added, obtained from *Acmella Oleracea*, a plant of tropical origin. The studies carried out demonstrate a rapid effect on the reduction of wrinkles, by immediately limiting facial micro-contractions, due to its muscle-relaxing action.

Sodermol®

SMOOTHING ELIXIR

COMPOSITION: Effective smoothing and myo-relaxing treatment to reduce wrinkles and expression lines both around the eyes and lips, with proven results both in vivo and in vitro. Ecocert and Cosmos certificate.

PRESENTATION: 15ml dropper bottle.

PAO: 12M

INCI: Propanediol; Aqua; Acmeella Oleracea Extract.

DIRECTIONS: Apply to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

INSTANT FLASH

COMPOSITION: It constitutes an instant vitalizing product, due to its immediate tightening action.

Formulated with a purified fraction of polysaccharides extracted from Quinoa seeds. It is an innovative active ingredient with an immediate lifting and anti-wrinkle effect, and a marked film-forming and tightening effect, as shown by the results of in-vivo efficacy studies.

Creates a cohesive, continuous and long-lasting biological film, strong and durable, that exerts a lifting effect, which helps keep skin cells cohesive, thus improving the barrier function:

Preventing trans-epidermal water loss that causes premature aging.

Retaining moisture.

Protecting the skin from environmental stresses and pollution

It also contains a plant active ingredient, which is derived from *Fomes officinalis*, a fungus native to the coniferous forests of North America and Europe.

Also called Agarikon, given its agaric acid content, it was the most important medicinal mushroom in ancient Europe and has ancient astringent, tightening and moisturizing properties. Agaric acid is a natural astringent that eliminates excessive sebum secretion, smoothing, tightening and hydrating the skin. Its astringent and tightening effect on pores provides a sensation of freshness and hydration, making the skin more flexible.

PRESENTATION: 5 x 3 ml dropper bottle.

PAO: 12M

INCI: Aqua; Chenopodium Quinoa Seed Extract; Propanediol; Methylpropanediol; Caprylyl Glycol; Sodium Polyacrylate; Fomes Officinalis Extract; Phenylpropanol.

DIRECTIONS: Apply to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

ROSEHIP OIL

COMPOSITION: Rosehip Oil, high in essential fatty acids, is related to tissue regeneration and skin defense mechanisms. Faster skin regeneration and restructuring of damaged tissues is achieved.

PRESENTATION: Airless 30ml

PAO: 12M

INCI: Rosa Canina Fruit Oil.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

DeBruks
method

Sodermol®

FACIAL CLEANSING FOAM

COMPOSITION: Easy-to-apply facial cleansing foam that eliminates impurities and excess sebum.

It contains a plant active ingredient, which is derived from *Fomes officinalis*, a fungus native to the coniferous forests of North America and Europe.

Also called Agarikon, given its agaric acid content, it was the most important medicinal mushroom in ancient Europe and has ancient astringent, tightening and moisturizing properties. Agaric acid is a natural astringent that eliminates excessive sebum secretion, smoothing, tightening and hydrating the skin. Its astringent and tightening effect on pores provides a sensation of freshness and hydration, making the skin more flexible.

PRESENTATION: 150 ml foaming bottle.

PAO: 12M

INCI: Aqua; Citrus Aurantium Amara Flower Water; Cocamidopropyl Betaine; Glycerin; Methylpropanediol; Propanediol; Lauryl Glucoside; Caprylyl Glycol; Maltooligosyl Glucoside; Hydrogenated Starch Hydrolysate; Fomes Officinalis Extract; Phenylpropanol; Sodium Benzoate; Lactic Acid; Potassium Sorbate; Citric Acid.

DIRECTIONS: Apply daily to previously moistened facial skin. Massage gently and rinse with plenty of warm water.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

MOISTURIZING FACIAL TONIC

COMPOSITION: Contains a plant active ingredient, which is derived from Fomes officinalis, a fungus native to the coniferous forests of North America and Europe.

Also called Agarikon, given its agaric acid content, it was the most important medicinal mushroom in ancient Europe and has ancient astringent, tightening and moisturizing properties. Agaric acid is a natural astringent that eliminates excessive sebum secretion, smoothing, tightening and hydrating the skin. Its astringent and tightening effect on pores provides a sensation of freshness and hydration, making the skin more flexible.

Panthenol is a pro-vitamin that, when applied to the skin, is absorbed and transformed into vitamin B5. Due to its moisturizing properties and its ability to promote the natural skin regeneration process, it is part of different cosmetic and personal care products, as it helps soften and improve the appearance of the skin in the face of certain skin disorders.

The use of panthenol is ideal to relieve irritated or red skin thanks to its hydrating, emollient and humectant properties. Each new application will help form an insulating barrier that will prevent water loss and protect it from external aggressions.

Allantoin is a humectant substance, that is, it increases the hydration of the superficial layers of the skin, and therefore is used to repair the barrier function. Allantoin promotes cell regeneration and has calming and anti-irritant functions.

PRESENTATION: 200 ml bottle

PAO: 12M

INCI: Aqua; Propanediol; Methylpropanediol; Glycerin; Caprylyl Glycol; Panthenol; Fomes Officinalis Extract; Allantoin; Phenylpropanol.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

MICELLAR WATER

COMPOSITION: Micellar water is a solution that cleanses the skin of the face and around the eyes. The micelles contained in its formula allow the elimination of impurities while respecting the skin balance.

It also contains Betaine, a highly moisturizing and emollient active ingredient. Especially indicated for removing makeup residue due to its dragging power.

PRESENTATION: 200 ml bottle

PAO: 12M

INCI: Aqua; PEG-8 Caprylic/Capric Glycerides; Methylpropanediol; Betaine; Hamamelis Virginiana Leaf Water; PEG/PPG – 18/18 Dimethicone; PEG/PPG-15/15 Allyl Ether Acetate; PEG-40 Hydrogenated Castor Oil; Trideceth-9; Phenoxyethanol; Caprylyl Glycol; Disodium EDTA; Phenylpropanol; Propylene Glycol; Triethanolamine; Gluconolactone; Sodium Benzoate; Potassium Sorbate; Calcium Gluconate,

DIRECTIONS: Soak a cotton pad with micellar water. Cleanse and/or remove makeup from the face and around the eyes. It can be used without rinsing, but it is essential to dry the skin gently without rubbing.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

EXFOLIATING FACIAL CREAM

COMPOSITION: Hyaluronic Acid contributes strongly to the water maintenance and structure of the skin, acting as a link between water molecules and tissues. It constitutes a powerful moisturizing agent. It also has, according to various studies, anti-inflammatory capacity, acting firstly with a “barrier” effect for germs and secondly by binding to the germs through a surface protein. Its moisturizing capacity has been proven because it acts on the dermis, contributing to tissue regeneration and maintaining water balance. The disaccharide molecules are easily hydrated, creating an ionic barrier, as well as a water reservoir by bonding with it. The topical use of Hyaluronic Acid helps to rehydrate the skin thanks to the cross-linking of the chain of this acid in the fundamental substance of the dermis, which fills the interfiber spaces of collagen, causing water retention as if it were a “molecular sponge.” “. Contains exfoliating apricot seed particles, which are obtained by finely grinding the seed. Natural exfoliants are physical cleansing particles, derived from natural, green and ecological materials. Additionally, they are designed to rejuvenate the skin without the irritating effects often associated with prolonged use of chemical exfoliants. Physical exfoliation removes dead cells and excess oil and dirt.

PRESENTATION: 50 ml jar.

PAO: 12M

INCI: Aqua; Hydrogenated Polydecene; Prunus Armeniaca (Apricot) Seed Powder; Methylpropanediol; Sodium Polyacrylate; Ethylhexyl Stearate; Glycerin; Caprylyl Glycol; Parfum; Trideceth-6; Disodium EDTA; Phenylpropanol; Sodium Hyaluronate; Linalool; Citronellol; Limonene.

DIRECTIONS: Apply to clean, damp facial skin. Massage gently and rinse with plenty of warm water.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

CLEANING GEL

COMPOSITION: Its gentle cleansing base, together with specific active ingredients for the treatment of acne-prone skin, provide a cleansing, sebum-regulating, soothing and anti-irritant action. Its main active ingredient is Azeloglycine, which is the union between Azelaic Acid and Glycine. This union causes its properties to increase compared to the two compounds separately. It acts mainly as a sebum normalizer, moisturizer and improves the elasticity and luminosity of the skin. Azelaic Acid is well known for its antibacterial, anti-inflammatory and sebum-regulating properties, but it caused problems when formulating and the union of this with Glycine results in Azeloglycine, which is safer and has better tolerance. keeping the same beneficial activity.

Contains Betaine, a highly moisturizing, soothing and anti-irritant active ingredient. Betaine is an essential natural component in maintaining water balance and is found in most animals and plants. It is a highly purified, anhydrous betaine extracted from beets. Osmolytes control the water balance of living cells by attracting and retaining moisture, making it a highly hydrating product. Protects at a cellular level against stress and reinforces the skin barrier. It also reduces irritation and has an anti-inflammatory effect. It has been observed that keratinocytes use betaine to maintain cellular homeostasis against oxidative stress, and that it increases fibroblast growth and collagen production.

PRESENTATION: Airless 100 ml.

PAO: 12M

INCI: Aqua; Disodium Laureth Sulfosuccinate; Sodium Lauryl Sulfoacetate; Cocamidopropyl Betaine; Betaine; Sodium Chloride; Potassium Azeloyl Diglycinate; PEG-10 Olive Glycerides; PEG-55 Propylene Glycol Oleate; Propylene Glycol; Caprylyl Glycol; Dipropylene Glycol; Disodium EDTA; Citric Acid; Parfum; Glyceryl Caprylate.

DIRECTIONS: Apply directly to the skin of the face with a gentle massage. Remove with warm water.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

CLEANING TONIC

COMPOSITION: Toner recommended for oily skin, as it helps eliminate impurities and regulates sebum secretion. In addition, it has a refreshing and decongestant action.

PRESENTATION: 200 ml bottle

PAO: 12M

INCI: Aqua; Glycerin; Citrus Aurantium Amara Flower Water; Methylpropanediol; PEG-30 Castor Oil; Sambucus Nigra Flower Extract; Centella Asiatica Extract; Hamamelis Virginiana Leaf Extract; Alchemilla Vulgaris Extract; Alcohol Denat.; Camphor; Disodium Laureth Sulfosuccinate; Sodium Lauryl Sulfoacetate; Gluconolactone; Sodium Benzoate; Potassium Sorbate; Sulfur; Calcium Gluconate; Phenoxyethanol; Caprylyl Glycol; Phenylpropanol; Disodium EDTA.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

CLEANING TONIC

ADDITIONAL CHARACTERISTICS: It contains numerous plant extracts with astringent and soothing action in its formulation, such as Sauco extract, Hamamelis, Alchemilla, Centella asiatica, Orange Blossom; and a sebum-regulating active ingredient, biosulfur.

Elderberry extract is obtained from the *Sambucus nigra* flower, and anti-inflammatory, emollient and decongestant properties are attributed to it.

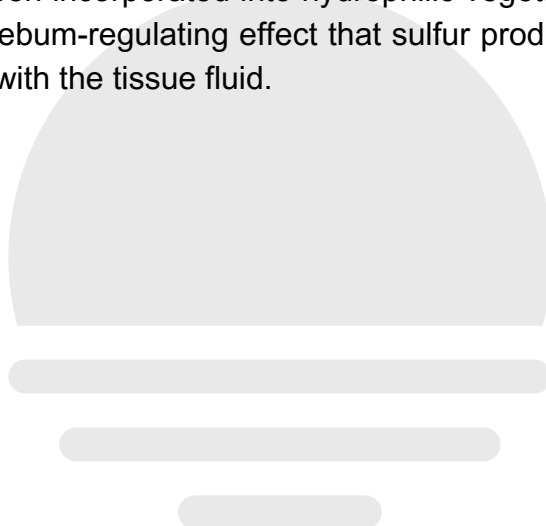

Hamamelis extract, obtained from the leaves of *Hamamelis virginiana*, has a very varied composition: tannins, phenolic acids, flavonoids and mucilage. It has astringent (reducing the secretion of sebaceous glands), decongestant and soothing properties. It produces vasoconstriction, but also acts as a vascular protector.

Alchemilla extract is extracted from *Alchemilla vulgaris*. Its composition contains tannins, responsible for its astringent action, making it ideal for the care of oily skin.

Centella asiatica extract comes from the leaves of *Hydrocotyle asiatica*. Among the different active ingredients present in this plant, we find mainly flavonoids and saponosides, whose general action can be attributed to the stimulation they exert on fibroblasts and other fundamental components of the dermis, and to the improvement of skin microcirculation, causing a normalization of the connective tissue. .

The Orange Blossom distillate stands out mainly for its antimicrobial action, due to its essential oil content, therefore acting as an antiseptic, tonic and purifying.

In biosulfur, sulfur has been incorporated into hydrophilic vegetable oils, in order to make it soluble in water. The sebum-regulating effect that sulfur produces on the skin is due to the formation of sulfides with the tissue fluid.

Sodermol®

EAU DE TOILETTE FOR MEN

COMPOSITION: It is a masculine fragrance from the woody olfactory family.

It is an aromatic blend of lavender and spicy bergamot, highlighting crushed herbs and creamy woods. Spicy bergamot and warm white amber with base notes of earthy musk.

PRESENTATION: 100 ml glass bottle.

PAO: 36M

INCI: Alcohol Denat.; Aqua; Parfum; Citronellol; Coumarin; Linalool; Citral; Geraniol; Limonene.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.

Sodermol®

EAU DE TOILETTE FOR WOMEN

COMPOSITION: It is a feminine fragrance from the fruity citrus olfactory family. The top notes are Amalfi lemon, bergamot, kumquat, passion fruit and orange. It is followed by heart notes of sweet paprika, rose, lily and water lily. Finally, as base notes, it has sandalwood, Virginia cedar and musk.

PRESENTATION: 100 ml glass bottle.

PAO: 36M

INCI: Alcohol Denat.; Aqua; Parfum; Limonene; Linalool; Coumarin; Citral; Geraniol; Citronellol; Isoeugenol; Benzyl Alcohol.

DIRECTIONS: Apply daily to clean, dry skin with a gentle massage until completely absorbed.

PRECAUTIONS: Avoid contact with eyes, in case of contact with eyes, wash with plenty of water.
